Recommendation letter for Kélyan Théo Hangard

It is a pleasure to recommend Kélyan Hangard as a strong candidate for the Master "Data Science" at EPFL.

Kélyan Hangard is currently in his third year of the Bachelor program in micro-engineering at EPFL, and, he is interested and strongly motivated to pursue his studies with the Master "Data Science".

Kélyan Hangard has interesting academic and personal profiles. He was in particular member of the EPFL Rocket team, and spent time as an exchange student in Stockholm.

Personally, I know Kélyan Hangard from the second semester course in Analysis which I teach on a regular basis at EPFL. The course "Analysis II" is one of the corner stones of the first year education of engineers at EPFL, and Kélyan Théo Hangard performed exceptionally well in this course. By achieving the top grade 6/6 he ranked in the top 5% of his class.

I have no doubt that Kélyan Hangard will perform equally well in his Master studies, and, for the reasons outlined above, I strongly recommend Kélyan Hangard for the Master "Data Science".
